Mobileye Fleet Safety Solution

The core component of Mobileye 6 Series System consists of a windscreen-mounted vision sensor for image processing and EyeWatch display for visual warnings. It can identify potentially dangerous situations, and provide audio and visual alerts to assist the driver in preventing or mitigating collisions. After the system is connected to the tracker, real-time location data, trip details, driver behavior analysis, and driver scores will be provided.

### Driver profile chart (Mobileye)

![Driver profile chart](image)

### Events percentage

- Too fast approaching to vehicle ahead
- Too fast approaching to pedestrian
- Left line without blinker
- Right line without blinker
- Vehicle distance alarm
- Exceeding speed limit

### Number of events per 100km

- **Too fast approaching to vehicle ahead**
- **Too fast approaching to pedestrian**
- **Left line without blinker**
- **Right line without blinker**
- **Vehicle distance alarm**
- **Exceeding speed limit**
