GPS Tracking for Water Sports

Product Model: P99G tracker | Region: Germany

Extreme sports such as water sports and skydiving often involve a high degree of risk, so safety of outdoor enthusiasts has always been of paramount importance and precautions must be taken to avoid injuries and death. The compact and portable P99G GPS tracker, one of the perfect choices for adventure activities, can ensure a safe and sure adventure and provide reassurance for their family members and sports clubs. The unit features long battery life and an impressive drop-proof, shock-resistant, wear-resistant, and water-resistant protective case, which can withstand more extreme conditions. During a trip, the device can detect a valid network signal within seconds. With the tracking unit, their family members and sports clubs can not only pinpoint their locations anytime and anywhere, but also listen in to hear what is happening around these adventurers and get accurate sports data, such as the speed, time, direction, height and travelling distance. After all the data collected is compressed, it can be transmitted faster, which gives family members and sports clubs peace of mind. If any accidents are around the corner, outdoor enthusiasts can immediately press the SOS button to send a signal for help. Once receiving the emergency alert, the closest police unit will be dispatched to the assigned area, thus ensuring the safety of these adventurers. In addition, the tracking unit can keep a comprehensive log of their sports performances, which can be later viewed from Meitrack MS03 tracking system on a computer or smartphone and used as a source for data analysis for sports events.

Key Benefits:

- Improve safety of outdoor enthusiasts
- Track outdoor enthusiasts anytime and anywhere
- Record sports performances

Solution:

About Meitrack:

Meitrack Group established in 2002, is headquartered in Shenzhen, China. Since its foundation, Meitrack has dedicated itself to the on-going pursuit for excellence in the Telematics field.
